

Mark the World Day of the Sick,

on February 11, 2017

an invitation to let ourselves be surprised

After a hard winter being sheltered from sight, a golden crocus suddenly shoots up which astonishes and revives our sense of hope.

This year, the material which is being offered puts the spotlight on the radiance of the crocus; it offers up a reflection and an activity to be able to « taste these sweet little nothings, which reopen life to us, allowing it to breathe once again... as if all at once life itself was passing by your window with a wreath of light » (Interview with François Busnel and Christian Bobin, *Lire*, February 2013, p. 46)
